DISCOUNTS for people signing up as a small group from the same faith community or ministerium

People of faith possess the moral authority to be important and credible parties to the awakening of awareness and responsibility for climate change among elected leaders and non-elected policy makers.

We seek to prepare people of faith who are willing to pro-actively initiate meetings with policy makers, electoral candidates and other religious leaders to lift up the moral dimensions of this crisis and support effective and rapid transition plans for a just clean energy future in Pennsylvania and the nation.
